ANMOL GUPTA

Co-Founder, MythyaVerse | AI Systems & Product Builder

anmol@mythyaverse.com | agi.guptaanmol@gmail.com | +91 8369716839 | https://linkedin.com/in/anmolscd | https://github.com/binarycache

SUMMARY

- Co-founder of MythyaVerse, building AI products and automation systems from real customer workflows.
- Combines product ownership, solution architecture, and hands-on engineering across LLM systems, RAG, agents, cloud deployment, Kubernetes, OCR, computer vision, evaluation, and AI developer tooling.
- Double Ph.D. in computational cognitive neuroscience and machine learning, with published work across EEG modeling, cognitive workload classification, and computational models of depression.

CORE EXPERTISE

- Production AI systems: workflow discovery, solution architecture, production system design, cloud deployment, scaling, monitoring, and iteration from customer-facing implementations.
- Domain workflows: healthcare operations, recruiting, education platforms, fintech and exchange operations, customer support, marketing, compliance, finance, and internal automation.
- AI, cloud, and platform engineering: LLM/VLM systems, RAG, agents, OCR, document AI, computer vision, clinical AI, model tuning, Docker, Kubernetes, cloud infrastructure, deployment, monitoring, and evaluation.

EXPERIENCE

MythyaVerse | Co-Founder & Chief Executive Officer

India | 2022 - Present | mythyaverse.com

- Co-founded MythyaVerse, an AI product studio building domain-specific AI products and production automation systems.
- Own product direction across discovery, workflow mapping, solution architecture, cloud deployment, technical delivery, monitoring, and iteration.
- Built and commercialized VRecruit, an AI recruiting platform for screening, coding rounds, AI interviews, scheduling, and candidate comparison.
- Built Sloth, a healthcare AI product integrated with PointClickCare workflows for US care teams.
- Developing MazeLedger for fintech and exchange workflows across operations, compliance, finance, and trading support.
- Shaping education products across upskilling, student support, teacher workflows, assessment, feedback loops, and conceptual remediation.
- Worked with public ecosystem and enterprise brands including ZebPay, Extramarks, IIT Kanpur, boAt, Hyundai, Tata, India Post, and Reliance Insurance.

SELECTED PRODUCTS / SYSTEMS

- Healthcare systems: clinical assistants, PointClickCare integration, ECG modeling, dental caries identification, and segmentation-based computer vision.
- Education systems: AI-human course delivery, 24x7 student assistants, dynamic difficulty, teacher workflows, feedback loops, and remediation.
- Fintech and exchange systems: operations, customer care, marketing, trading support, compliance, and finance workflows.
- Enterprise systems: RAG copilots, agentic workflows, OCR/document AI, internal automation, cloud-native deployment, Kubernetes-based services, and applied LLM/VLM systems.

TECHNICAL SKILLS

- AI systems: LLM/VLM systems, RAG, vector retrieval, prompt design, structured outputs, agents, tool calling, evaluation, OCR, document AI, and model tuning.
- AI developer tooling: Codex, Claude Code, MCP integrations, plugins, orchestration, and agent runtimes.
- Programming, cloud, and platform: Python, C++, JavaScript / TypeScript, PyTorch, TensorFlow, scikit-learn, FastAPI, SQL, Docker, Kubernetes, Linux, GitHub Actions, CI/CD, solution architecture, model serving, cloud deployment, and monitoring.

Ph.D. | University of Groningen and IIT Roorkee

Computational Cognitive Neuroscience and Machine Learning | 2018 - 2025

- Completed research on modeling and quantifying rumination and depression using behavioral experiments, computational cognitive models, EEG, and machine learning.
- Designed cross-national behavioral studies, neurophysiological experiments, and computational models to identify mechanisms underlying depressive cognition.

- Built EEG classification pipelines for cognitive workload, attention states, and demographic prediction using deep learning and functional connectivity features.
- Developed cognitive modeling work in ACT-R and instance-based learning, connecting human memory and decision-making theory with practical ML evaluation.

EDUCATION

- Ph.D., Computational Cognitive Neuroscience and Machine Learning - University of Groningen, 2018 - 2025
- Ph.D., Computational Cognitive Neuroscience and Machine Learning - IIT Roorkee, 2018 - 2025
- M.Tech., Computer Science - NIT Hamirpur, 2014 - 2016 | CGPA: 9.18
- B.Tech., Computer Science - NIT Uttarakhand, 2010 - 2014 | CGPA: 8.93

SELECTED RESEARCH

- Modeling the Ruminative Mind: Behavioral, Computational, and Neurophysiological Approaches (Ph.D. thesis, University of Groningen and IIT Roorkee, 2025).
- Modeling Effects of Rumination on Free Recall Using ACT-R - Topics in Cognitive Science, 2024.
- Efficacy of Transformer Networks for Classification of EEG Data - Biomedical Signal Processing and Control, 2024.
- Raw EEG Cognitive Workload Classification using Directed Functional Connectivity and Deep Learning - Big Data, 2023.
- Subject-Specific Cognitive Workload Classification using EEG-Based Functional Connectivity and Deep Learning - Sensors, 2021.
- Evaluation of Instance-Based Learning and Q-Learning Algorithms in Dynamic Environments - IEEE Access, 2021.
- EEG-Based Age and Gender Prediction using Deep BLSTM-LSTM Network Model - IEEE Sensors Journal, 2018.

Visiting PhD Researcher, University of Groningen (2021): cross-national work on reward learning, spontaneous thought, and depression mechanisms.
Research Intern, INMAS-DRDO (2019): EEG-based depression studies and meditation-effect analysis on clinical cohorts.
Research Intern, ACS Lab IIT Mandi (2019): PyIBL vs Q-learning benchmarking in dynamic environments (later published).
Research Visit, Osaka Prefecture University (2018): BCI and deep learning collaboration under JST Sakura program.

VOLUNTEER / ACADEMIC SERVICE

- Invited speaker, Winter School on Cognitive Modeling, IIT Mandi (2021, 2022).
- Teaching Assistant, Deep Learning Track, Neuromatch Academy (2022).
- Peer review service for venues including Nature Scientific Reports, Springer Nature Computer Science, and IET Biometrics.

Alpha Tester / Mentor, deeplearning.ai (Coursera).
Voluntary Teaching, Evidyalok: taught English to village students in Sarath, Jharkhand.
